Subject: Item for Friday's Weekly RD email

On Monday, registration amendments were approved allowing the use of replacement container types for a group of mosquito control products. Previous testing done on these products had revealed the presence of per- and polyfluoroalkyl substances (PFAS) which were subsequently identified as contaminants in the containers these products were packaged in. The efforts of **Jackie Herrick, Maria Rodriguez, Dehui Duan, and Shyam Mathur** were instrumental in evaluating the data associated with these actions and providing a timely response. Awesome Possum!
